Subject Restricted data support

Description of Problem or Suggestion:

ASF restricted data may be searched and browsed. While the restricted data is being queried the user should get an indication that the data is restricted so they don't spend lots of time preparing an order only to have it rejected. If an order is rejected due to access restrictions, the order should be saved via a UR so once the user is approved they don't have to redo the request. When an order is rejected due to access restriction instructions on how to apply to become an approved user should be made available to the user automatically.

Originator's Recommendation

Make sure the system supports this.
